Rheem Central Gas Water Heaters

SAVE YOUR ENERGY

RHEEM
CENTRAL GAS WATER HEATERS

Overview

Rheem Residential Gas Water Heaters provide reliable, high-capacity hot water for everyday household needs.
Available in multiple tank sizes and configurations, they combine durable construction, advanced safety features, efficient performance, and long service life.
Designed for residential applications, these heaters deliver dependable comfort while helping reduce operating costs.

Features:

- **Available in Natural Gas and LPG (Propane) models.**
- **Durable Rheemglas® porcelain enamel tank lining for extended tank life.**
- **EverKleen™ self-cleaning system reduces sediment buildup and improves efficiency.**
- **Guardian™ Flammable Vapor Ignition Resistant (FVIR) safety system.**
- **Exclusive air shut-off system for enhanced safety protection.**
- **Maintenance-free design with no filters to clean or replace.**
- **High-efficiency operation for lower energy consumption and operating costs.**
- **Patented R-Tech anode rod protects against corrosion.**
- **Fast recovery rates for continuous hot water availability.**
- **Multiple venting options available depending on model.**

SOLARENA ENGINEERING

RHEEM
CENTRAL GAS WATER HEATERS

Applications

- Villas and Residential Homes.
- Apartments and multi-family residences.
- Homes requiring central hot water systems.
- Large households with high hot water demand.
- Indoor utility room installations.
- Sheltered exterior service enclosures

Specifications:

- Storage capacities: 40, 50, and 75 US Gallons.
- Natural Gas or Liquid Propane (LPG).
- Tank construction: Rheemglas® porcelain enamel-lined steel tank.
- Corrosion protection: R-Tech anode rod.
- Safety system: Guardian™ FVIR technology with flame arrestor plate.
- Self-cleaning technology: EverKleen™ sediment reduction system.
- Temperature control: Integrated gas control thermostat.
- Pressure protection: Factory-installed Temperature & Pressure (T&P) relief valve
